Addressed to:
Mistral AI

16 October 2025

Dear Hiring Manager,

I am writing to express my profound interest in the Expert in Large Language Models and Distributed Systems position at Mistral, a role I discovered on LinkedIn. Your mission to democratize AI through open-source, frontier models deeply resonates with my own professional and academic background, and I am incredibly enthusiastic about the prospect of contributing to your pioneering work.

My profile is a direct match for your requirements, combining a Ph.D. with original contributions in generative models and over seven years of hands-on deep learning experience with frameworks like PyTorch. This deep theoretical foundation is complemented by robust, practical expertise in building the very systems you are looking for. Specifically, I have extensive experience designing GenAI prototypes with Retrieval Augmented Generation (RAG), developing agentic frameworks, and deploying scalable, production-grade solutions using Kubernetes and Docker.

I am not just a researcher but also a builder, having developed original deep learning architectures and even created an open-source GNN library. I am confident that this unique blend of foundational research capabilities and high-competence systems engineering would allow me to immediately contribute to your efforts in pushing the frontier of large language models and shipping AI systems with real-world impact.

I am very eager to discuss how my background in both novel model development and scalable MLOps can support the Mistral team. Thank you for your time and consideration. I look forward to hearing from you soon.

Sincerely,

Charilaos Mylonas
